

# POWER WAGON

## 3/4 TON 4 X 4

# DODGE

LATE-MODEL M-37  
THREE-QUARTER TON

# Trucks!

This is the U.S. Army's reliable 3/4-ton 4-wheel-drive vehicle like those currently being used in Vietnam. While these trucks trace their ancestry to the 1/2 and 3/4-ton weapons carriers and command cars of World War II, the ones being offered are current models with longer wheelbase, sprung for heavier payloads. Many parts are interchangeable with those of the Dodge "Power Wagon", still being produced in its basic form for the general public.

**CONTRACTORS! FARMERS! SPORTSMEN!  
SNOW-PLOW! CROSS-COUNTRY USE!**

This is a real work-horse with hundreds of applications on and off the highway! Four-speed transmission! Four-wheel drive! High-low transfer case! Six-cylinder engine! 24-volt system for easier starting! New batteries! Good 9.00 x 16 8-ply tires!

See opposite side for complete specifications.
